Product Description

9T25: An acrylic sheet in a very special color. ACRYLIC (ACRYLIC), common name, ACRYLIC specially treated plexiglass. The research and development of acrylic has a history of more than 100 years. The polymerization of acrylic acid was discovered in 1872; The polymerization of methacrylic acid was known in 1880; In 1901, the synthesis of propylene polypropionate was completed; In 1927, the synthetic method mentioned above was used to try industrial manufacturing. In 1937, methyl acid grease industry was successfully manufactured and developed, which led to large-scale manufacturing. During world War II, due to the excellent strength, toughness and light transmittance of acrylic, it was first applied to the windshield of aircraft and the field of vision mirror of tank drivers' cab. The birth of the world's first acrylic bathtub in 1948 marked a new milestone in the application of acrylic.

It is a very special black color. One side is matte black and the other is shiny black. This color is very noble and novel.

We gain a foremost standing to serve our loyal clients in the market of Middle East, Latin America and so on.

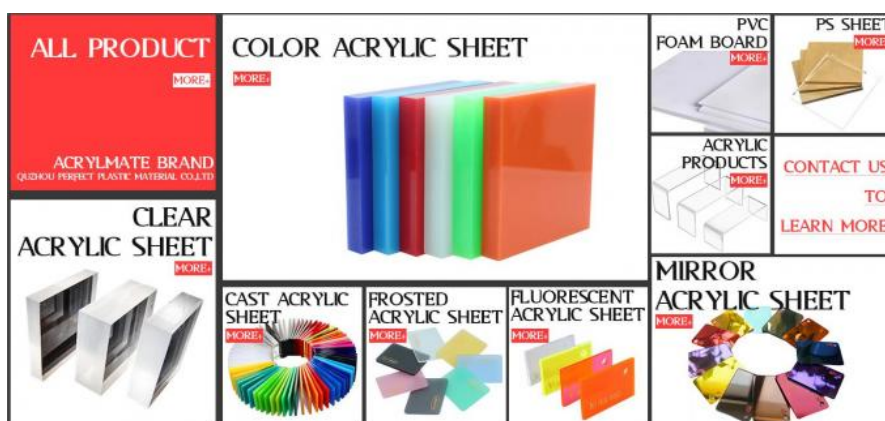

Specifications:
