Product Details

"Acrylic" is a transliterated word, and English is ACRYLIC. It is a chemical material. The chemical name is "PMMA", which belongs to acrylic alcohol, commonly known as "specially treated plexiglass." In the application industry, the raw materials of acrylic are generally particles and plates. , Pipes and other forms. The acrylic mirror panel is coated with a thin layer of aluminum on the back of the acrylic plate. The process is similar to the glass mirror.

Use In Construction: For example, many shop windows, lighting shades, soundproof doors and windows, public telephone booths and some mirrors used for decoration are all made of acrylic through processing;

Applications In Some Advertising: For example, light boxes, signs and signs that are common in our lives;

Application In Traffic: This is what we can often come into contact with and see. Car lenses or car mirrors are also made of selected acrylic;

Acrylic Mirrors Will Also Be Used In Medicine:For example, baby incubators and some medical appliances used in surgery are also made of acrylic;

Industrial Applications: This is mainly used for the surface panels and covers of some industrial instruments;

In Terms Of Lighting: the fluorescent lamps in our lives, the very beautiful chandeliers and lampshades in our lives are all made of acrylic.
