Product Description

Factory Price Wall Panel 3mm 5mm 10mm 4x8ft PVC Celuka Foam Board for Sign Printing

PVC Foam Board Details:

PVC foam board, as a new type of synthetic material, occupies an important position in the modern material market with its unique properties and wide application fields.

We offer different density and thickness of PVC Foam Board to our customers.

There are two types of PVC Foam Board: Free Foam Board, Celuka Foam Board.

The board is made by expanding PVC (polyvinyl chloride) into a foam-like structure, which is then compressed into flat sheets of varying thicknesses. The resulting material is lightweight, but still sturdy, making it an excellent alternative to heavier materials such as wood, metal or solid plastic.

PVC foam board is also easy to work with, as it can be cut, drilled, nailed, painted and fabricated using standard tools. It is also weather-resistant and has good insulation properties, making it suitable for both indoor and outdoor use.

Specifications:

Place of Origin:	Zhejiang, China
Brand Name:	SM

Material:	PVC
Size:	1220*2440mm, 2050*3050mm
