## Product Description

Acrylic PVC Foam Board Strong Durable Material for Various Applications with Low Price

### PVC Foam Board Details:

#### Applications:

Building, project, kitchen cabinet, display

There are two types of PVC Foam Board: Free Foam Board, Celuka Foam Board.

The board is made by expanding PVC (polyvinyl chloride) into a foam-like structure, which is then compressed into flat sheets of varying thicknesses. The resulting material is lightweight, but still sturdy, making it an excellent alternative to heavier materials such as wood, metal or solid plastic.

PVC foam board is also easy to work with, as it **can be cut, drilled, nailed, painted and fabricated** using standard tools. It is also weather-resistant and has good insulation properties, making it suitable for both indoor and outdoor use.
