## Product Description

Customized Size and Thickness Retardant 3mm-20mm PVC Foam Board for Your Choice

### PVC Foam Board Details:

Sheet package: use PE film as inner packing first, 50 pieces per bag or as your requirement.

Pallets packing: 500-2000kgs per wooden pallets with the carton protection.

The board is made by expanding PVC (polyvinyl chloride) into a foam-like structure, which is then compressed into flat sheets of varying thicknesses. The resulting material is lightweight, but still sturdy, making it an excellent alternative to heavier materials such as wood, metal or solid plastic.

PVC foam board is also easy to work with, as it **can be cut, drilled, nailed, painted and fabricated** using standard tools. It is also weather-resistant and has good insulation properties, making it suitable for both indoor and outdoor use.
