Certificate:	ISO9001, CE, ROHS, etc.
Color:	Any colors
Delivery:	15-30 days
Density:	1.2g/cm ³
Sample	available

Our Frosted Acrylic sheet is a specialty sheet that is manufactured to resemble "frost" on typical clear acrylic sheet. Typically referred to as a "heavy matte" appearance, this acrylic sheet is a standard choice for design applications requiring privacy or design effects with lighting.

Clear frosted Acrylic Sheets are a great choice to reduce glare, resist fingerprints, or signs of wear and tear. The matte-finish surface texture on both sides provides a diffusion pattern for obscuring background objects while allowing for optimal light transmission. Usually the light transmission is about 85%-90%. And also can add with a frosting additive incorporated throughout the sheet, it can be easily fabricated without significant loss of frosted appearance.

It is available in a wide range of sizes, thicknesses, and colors. You can also request to have your **acrylic sheet** cut-to-size or machined into fabricated parts to meet the exact specifications of your application.

We are a professional manufacturer of manufacturing industry starting from 2011. We use the pallet and craft or PE film protection for packaging.

We can provide free samples if you need, and you just pay freight.
