Product Description

Product Overview

The Colored Clear Acrylic Sheet for Menu Board & Price Sign is a tinted transparent PMMA panel made from virgin MMA resin, engineered for restaurant menu boards and retail price signs. It can be laser cut, routed, drilled, and edge polished to achieve clean, burr-free edges, with custom sizes available for menu frames, price plaques, and counter signage.

Its smooth surface supports high-quality UV printing and vinyl letter attachment for sharp text and graphics. Excellent rigidity and UV resistance prevent fading, warping, and cracking under indoor lighting or ambient sunlight. The sheet maintains bright tinted clarity and balanced light transmittance, making pricing information and menu content easy for customers to read.

Ideal applications include cafe menu boards, retail price signs, food stall display plaques, countertop menu holders, and promotional price markers.

Specifications

Place of Origin	Zhejiang, China
Brand Name	SM
Material	Acrylic
Size	1220 × 2440 mm, 1220 × 1830 mm, and other custom sizes
Thickness	1.8–40 mm

Grade	AAAAA
MOQ	2 tons
Technology	Cast
Certificate	ISO9001, CE, ROHS, etc.
Color	Any custom colors
Delivery	15–30 days
Density	1.19 g/cm ³
Sample	Available

Key Advantages

Soft Tinted Transparent Visual Effect

Our colored clear acrylic sheet for menu boards and price signs is manufactured from high-grade virgin MMA resin. Uniform color dispersion delivers a soft tinted transparent appearance. It features balanced light transmission that keeps printed text and price graphics legible, well suited for cafe menu plaques, counter price signs, and semi-transparent signage accents.

Flexible Processing Performance

This PMMA sheet accepts laser engraving, CNC routing, hole drilling, and flame polishing. Custom shapes and sizes are available to fabricate standing menu boards, hanging price tags, and countertop sign frames for food shops and retail outlets.

UV Resistant & Color Consistency

Dense, homogeneous sheet surface resists fading under indoor lighting and indirect sunlight. Regular wiping and daily cleaning will not cause color discoloration or loss of clarity. Stable tint and transparency maintain neat signage presentation for long-term restaurant and store use.

High Rigidity & Stable Form

High-quality virgin MMA material brings excellent structural rigidity. The sheet keeps its flat shape under normal indoor temperature fluctuations. It resists bending and deformation when mounted as menu back panels and price sign faceplates.

Product Features

Fade Resistant
Crack Resistant
UV Resistant
Impact Resistant
Weather Resistant
Lightweight

Customer testimonials and feedback for acrylic sheets

Frequently Asked Questions

Can you produce according to the samples?

Of course — OEM is welcome!

How can I get a sample?

Small samples are available for free; you only need to pay for shipping.

How long can I expect to get the sample?

We prepare samples within 3 days, with delivery typically taking 5–7 days.

What is your MOQ?

The minimum order quantity is 26 pieces for each size.

Do you test all your goods before delivery?

Yes, we have strict quality inspections and provide photos before shipment. Our dedicated R&D team ensures every product meets your requirements.

What is your lead time for mass production?

Normally 25–30 days.

What are your payment terms?

We accept T/T, L/C, PayPal, and Western Union.

How do you pack the products?

Each sheet is covered with PE film or craft paper, then palletized in 1.5-ton packages.
